IEEE LEADING TECHNICAL TEAMS WORKSHOP

This IEEE Leading Technical Teams Workshop guides participants in building and expanding leadership capability with specific focus on the uniqueness of leading technical talent. Using a 360° instrument, participants receive feedback regarding their leadership skills and establish a development plan for targeted improvement in leading their team. The intended result is increased team engagement, improved organization effectiveness, team collaboration and enhanced leadership capability.

IEEE Leading Technical Teams uses a blended learning approach including a multi-rater assessment, instructor-led exercises, case studies and peer coaching. You will have the opportunity to exchange ideas, knowledge, and experiences while developing relationships with other technical leaders.
